Universe Inc.

Employment Policy

(Effective Until MVP Completion)

1. Nature of Employment

TARS UNIVERSE (Universe) is currently in its **startup phase**. As such, operational structures, benefits, and support systems differ from those of established corporate environments. This initiative is **a personal venture of the Founder & CEO**, not a government-funded or externally sponsored project. All resources are deployed with careful consideration for the platform's early-stage growth.

2. Working Days & Hours

- **Days:** Saturday to Thursday
- **Time:** 9:00 AM to 6:00 PM
- **Lunch Break:** 1:00 PM to 2:00 PM
- **Friday:** Weekly holiday

3. Salary & Structure

- There is **no fixed corporate salary structure** until after the MVP launch.
- Any remuneration during this period is determined solely by **authorized decision of the Founder & CEO**.
- **Only actual working days will be counted** in salary calculation.
- Salary days or deductions are **non-negotiable** and will not be adjusted for reasons such as sick leave or personal absence.
- In cases of emergency absence, the employee may make up for the lost time by completing the assigned work on an **off day** (with prior approval). Failure to do so will result in salary deduction for that day.
- These measures are specific to the **startup phase** and may be revised after MVP completion.

4. Role Flexibility & Task Allocation

Given the startup nature of TARS UNIVERSE, employees may be required to perform **multi-disciplinary tasks**, including but not limited to:

- Preparing task lists and decision logs.
- Documenting processes and workflows.
- Creating design essentials (e.g., wireframes, information architecture).
- Research, vendor communication, and operational support.
- Assisting other departments when necessary.

5. Time Management & Productivity

- **Time is a critical resource.** Every team member is expected to work efficiently, manage priorities, and minimize delays.
- Performing non-company-related tasks during work hours is strictly prohibited.
- Misuse of company resources or time may result in immediate disciplinary action, including termination.

6. Startup Discipline & Accountability

- Daily progress updates are mandatory via assigned tools or reporting systems.
- Delays must be reported with a recovery plan.
- Negligence, repeated delays, or failure to meet commitments may lead to employment termination.

7. Confidentiality & Data Protection

- All documents, designs, data, and intellectual property created during employment are the sole property of TARS UNIVERSE.
- Unauthorized sharing of company information will result in immediate termination and possible legal action.

8. No Entitlement Clause

During the startup phase, employees **shall have no entitlement or claim** to:

- Fixed salary increments, bonuses, or allowances.
- Corporate-style benefits such as insurance, paid leave entitlements, provident funds, gratuity, or other perks.
- Negotiations regarding salary deductions arising from absence, sick leave, personal leave, or reduced working hours.
- Compensation for unapproved leave or time away from assigned duties.

This clause ensures that all employees clearly understand that **remuneration and benefits are subject to the company's startup operational limitations** and cannot be disputed or claimed as a right during this period.

9. Performance & Termination

Employment may be revoked if:

- The employee engages in tasks unrelated to company objectives during work hours.
- There is negligence or repeated quality issues in deliverables.
- The employee violates confidentiality, ethics, or startup discipline.
- The employee fails to comply with the working day/salary rules outlined in Section 3 or breaches the **No Entitlement Clause**.

10. Post-MVP Policy Updates

Upon successful MVP launch, TARS UNIVERSE will:

- Introduce a structured salary and benefits policy.
- Review and redefine roles and responsibilities.
- Establish additional employee support measures based on available resources and growth stage.

Acknowledgment

By signing this policy, you acknowledge that you understand and accept the unique operational and financial conditions of TARS UNIVERSE's startup phase, and agree to work under these terms until the MVP is complete.

TARS

MVP Understanding & Work Standard

(Annexure to Employment Policy – For Employee Reference)

1. Understanding the MVP

In TARS UNIVERSE, the **Minimum Viable Product (MVP)** is defined as the **first launch-ready version of the platform** — not a trial, partial build, or internal test system.
The MVP must:

- Be **fully functional** for real users from day one of launch.
- Include **all essential modules**, backend systems, and administrative tools required for smooth public operations.
- Meet **international standards** in performance, security, and user experience.
- Be capable of **handling live users, transactions, and real-world scenarios** without critical failures.

This means that in TARS UNIVERSE, "MVP" equals a **first release standard product**, not an experimental version.

2. Core MVP Features & Modules

A. Social Network Module *(User-Facing)*
- Authentication (sign-up, sign-in, password reset, account verification).
- User Profiles & Page Profiles.
- Home Feed with real-time content updates.
- Content CRUD (create, read, update, delete posts/events).
- Interactions (likes, comments, shares, follows).
- Direct Messaging.
- Reels (short videos).
- Search.

B. Project Module *(User-Facing)*
- Project creation with details and media.
- Project dashboard for updates and progress tracking.
- Collaboration tools for teams.
- Milestone tracking.
- Wallet/bank connection for funding.
- Convert project to page.
- Investment engagement tools.

C. Wallet Module *(User-Facing)*
- Bank/mobile wallet linking.
- Wallet dashboard.
- Send/receive/purchase functionality.
- Add money from connected accounts.
- Rewards and incentives.
- Investment-related transactions.

D. Marketplace Module *(User-Facing)*
- Listing of projects and offers.

- Filter & search.
- Engagement tools for investor and creator interaction.

E. Admin & Management Systems *(Internal Operations)*
- Admin dashboard for system control.
- User account management.
- Content moderation tools.
- Project approval/rejection system.
- Wallet and transaction monitoring.
- Reports & analytics.
- Role-based access control (RBAC).

F. Backend & Infrastructure Essentials *(System-Level)*
- API Gateway and load balancing.
- Secure authentication service.
- Database management for all platform data.
- Media storage for images, videos, and files.
- Notification system (email, push, in-app).
- Search service.
- Logging & monitoring tools.
- Cache services for speed optimization.

G. Third-Party Integrations & Compliance *(External Dependencies)*
- Payment and banking gateways.
- Identity verification services.
- Email/SMS communication gateways.
- Data protection and encryption compliance.

3. MVP Work Standards & Expectations

The MVP must:

- Be **ready for public release** on the official launch date.
- Operate without critical bugs or unfinished features.
- Have **consistent UI/UX** aligned with the approved design system.
- Maintain **high security** for user data and transactions.
- Load and operate smoothly under expected launch traffic.
- Have all features **documented and tested** before launch.

Acknowledgment

By signing this annexure, I acknowledge that the MVP in TARS UNIVERSE means a **first-launch-ready platform** with complete features, backend systems, admin tools, integrations, and compliance measures — capable of operating at public launch standards from day one.

TARS

First Launch Readiness Criteria

(Internal Reference – Mandatory Pre-Launch Checklist)

The MVP for TARS UNIVERSE will only be considered **ready for public launch** when **all criteria below** are met and approved by the Founder & CEO or authorized decision-maker.

1. Core Feature Completion

All four primary modules must be 100% functional without placeholders:

- **Social Network** – Authentication, user/page profiles, feed, content CRUD, interactions, messaging, reels, search.
- **Project Module** – Project creation, dashboard, milestones, collaboration, funding link, convert to page, investment engagement.
- **Wallet Module** – Bank/wallet linking, transactions, add money, send/receive, rewards, investment transactions.
- **Marketplace Module** – Listings, search/filter, engagement tools.

2. Admin & Management Tools

- Fully functional **Admin Dashboard** with user, project, and content management.
- **Content moderation** tools for immediate action on flagged posts/media.
- **Project review/approval** workflow.
- **Financial monitoring** for wallet transactions and suspicious activity.
- Role-based access control (RBAC) set up and tested.

3. Backend Infrastructure & Stability

- API Gateway configured with load balancing.
- Database optimized, backed up, and tested for recovery.
- Media storage functional for all content types (images, videos, files).
- Notification system operational (email, push, in-app).
- Search service delivering accurate and fast results.
- Logging & monitoring set up for performance tracking.
- Cache layer implemented for speed optimization.

4. Third-Party Integrations & Compliance

- Payment gateway(s) live and tested for real transactions.
- Identity verification fully integrated and working.
- Email & SMS gateways tested for delivery reliability.
- All data encryption and security compliance in place.
- Privacy policy, terms of service, and user agreements finalized and accessible.

5. UI/UX Quality

- All screens follow approved design system (color, typography, spacing, layout).
- Mobile and desktop versions responsive and visually consistent.
- Smooth navigation and interaction flow without dead ends.
- Professional-level visuals, icons, and animations where applicable.

6. Performance & Load Testing

- Platform loads under 3 seconds for all major pages under normal conditions.
- Tested to handle expected **launch-day concurrent users** without degradation.
- No critical crashes, freezes, or timeouts under load tests.

7. Security & Risk Mitigation

- No exposed endpoints or vulnerabilities.
- Strong password and account protection measures.
- Data encrypted in transit and at rest.
- Backup & recovery plan in place.
- Admin access restricted and secured with 2FA.

8. Documentation & Training

- Technical documentation complete for backend, frontend, and integrations.
- User guides or onboarding material prepared for new users.
- Admin and moderation team trained on tools and procedures.

9. Pre-Launch Approval Steps

- Internal QA sign-off for all features.
- Security audit completed and passed.
- Founder & CEO final review of **functionality, design, and stability**.
- “Go/No-Go” meeting held to confirm launch readiness.

10. Post-Launch Monitoring Plan

- 24/7 system monitoring active for first week after launch.
- Rapid-response bug fixing protocol in place.
- Communication plan ready for user feedback and support.

Note: Any feature, module, or system failing to meet these criteria will **delay launch until resolved**, regardless of original deadlines.

TARS
